

# Frequency Specific Microcurrent & Neurotherapy

## OPEN HOUSE

Friday, June 7th, 5:30 PM-7:30 PM

RSVP to 805-439-4825 to reserve your spot

Join us for an evening of education on **Frequency Specific Microcurrent (FSM)** one of the most coveted techniques used to help reduce inflammation and pain in the entire body in a non-invasive way.

**FSM & Neurotherapy (EEG)** provides healing – physically, mentally and emotionally. Think about it for a second. Our bodies run on electricity, our nervous system is electric. So why wouldn't you use electrical currents to speak to your body through its own language to calm the system's traumas?

**Breakthrough FSM technology helps these and more:**

- Reduce nerve, joint and muscle pain
- Reduce inflammation
- Dissolve and soften scar tissue
- Treat fibromyalgia

“...I've had many breakthroughs in our sessions as well as a reduction in physical and emotional pain caused by my injury. I cannot rave enough about Jayne and her FSM & EEG therapy! Jayne has a magical twinkle in her eye and the ability to make you feel seen, heard and understood. Her passion to help me heal physically and emotionally is unlike any treatment I've ever experienced! I am deeply grateful for the knowledge and healing I've received during my sessions. It's powerful technology provided by powerful professionals!” — Mandi

Learn how **FSM w/ EEG** can help you with your physical, mental and emotional wellbeing at our **Open House!**

Jayne Rutledge, Brain Coach to the Stars, will be demonstrating how FSM works, followed by a Q&A session.

All attendees will be entered to win  
a **FREE** session with Jayne!

TLC Brain Fitness Coach, Jayne Rutledge, with Dr. Lapidus.
